

Web Programming I

ITS 210

-Homework 2

Goals

To improve on your existing work by enhancing it with style sheets, table, and form controls.

Instructions

1. Style Sheet - *15 points*
 - Develop one style sheet for use in all your homework documents.
2. Home Page - *5 points*
 - Improve the look and feel of your home page with the use of tables and styles.
3. Modify your Homework 1 Essay - *15 points*
 - Style the page with CSS
 - ▶ Background colors and graphics
 - ▶ Text presentation and position
 - ▶ Link presentation (colors)
 - Put the table of contents in a table
4. Essay Feedback Form - *15 points*
 - Develop a “feedback” form page, linked from your essay, after the references section, which presents the user with the ability to enter the following (feel free to add to this list):
 - ▶ User Name – text
 - ▶ Password – password
 - ▶ General Comments – textarea
 - ▶ Thing you most liked – (four choices, **pick one**, radio buttons)
 - ▶ Things you didn’t like – (four choices, **pick as many as you like**, checkboxes)
 - ▶ Rating from 1 to 10 – select control
 - ▶ Submit button - submit
 - ▶ Clear button – reset
 - Like the rest of your work, this page should make excellent use of external style sheets, presenting the data in a clear, concise, professional (and creative) manner.

Submitting

Upload your entire site to your directory on my server via FTP as we discussed (several times now) and practiced in class.
